Fort du Bruissin centre d'art contemporain - Francheville (Fr)

Description of the artwork

Phonofolium et Lux is an interactive artwork with a living tree reacting to the human electrostatic touch by sounds and lights. Several sound and light characters are revealed when the audience is touching or stroking lightly it. The intensity of light's variations varies according to the proximity of contact with the tree

In the darkness, the tree is only light with spotlights. Interactions of audience with the tree illuminates and highlights the architecture around the tree in the exhibition space.

In their artwork, the artists Scenocosme create hybrids between plants and digital technology. Plants are natural sensors and are sensitive to various energy flows. In this kind of artworks, the technology disappears in order to enhance sensory relations and to augment senses. Mixing reality and imagination, they explore our relationships between the body and the environment: they can feel energetic variations of living beings and design interactive stagings in which spectators share extraordinary sensory experiences. Phonofolium et Lux lets us know about their existence by a scream, a melody and a lighting vibration. Sound characters generate various feelings and influence feedbacks of audience.

The scenography of lights depends of the architectural qualities in the exhibition space. And the light which enhances the architecture is vibrating and fragile, because it depends of the electrostatic energy of bodies.

Artistic process : hybridizations between nature and digital technology

As media artists, Scenocosme: Grégory Lasserre & Anaïs met den Ancxt, explore capacities of technologies in order to draw sensitive relationships through specific stagings where senses are augmented. Their works came from possible hybridizations between the living world and technology which meeting points incite them to invent sensitive and poetic languages.

They suggest to sound out, to feel elements of reality which are invisible or to whom we are insensitive. They use the idea of the cloud as a metaphor of the invisible. Because it has an unpredictable form, it is in indeterminate metamorphosis, and his process escapes to our perception. Various natural and artificial clouds surround us (climatic, biological, energetic or electromagnetic). Through their artworks, they evoke invisible energetic clouds (electrostatic) which follow living beings like unpredictable shadows. Sometimes, these clouds cross together and exchange some information. In a poetic way, they interpret these invisible links through sonorous and visual stagings. Then, when they imagine the energetic clouds of living beings, the limits of the body become permeable, and with their technology, in a way they design extraordinary relationships, between humans, and between humans and environment too. Interactions they offer in their works make invisible exchanges sensitive. Rather than revealing clearly their complexity, they open everyone's imagination. Between the reality and our perception, there is always a «blind point» which stimulates the imagination.

When they create interactive works, Scenocosme invent sonorous or/and visual languages. They translate the exchanges between living beings and between the body and its environment. They suggest interrelations where invisible becomes perceptible. Materialized, our sensations are augmented. Through a poetic interpretation of invisible mechanisms, technologies allow them to draw sensory relationships, and to generate unpredictable living interactions. Their hybrid artworks play with their own augmented senses. They live with technology and have reactions which escape deliberately to their control.

Scenography/ Technical informations

The artwork produces sounds and lights

It should be presented in a dark room

Sounds and lights systems are integrated in the space.

Inside or outside, the tree is placed in a pedestal. It must be exhibited in the darkness. Two spot focus on the tree only.

According to the exhibition place, leds spotlights are installed around the tree, on the ceiling, a facade, behind windows, in front of columns,...

The sound comes from the pedestal and from an audiosystem which surround the tree in order to immerse the audience.

Equipment:

- a small tree (high between 1m50 to 2m)
- a wood pedestal
- a computer PC
- a small audio system
- our electronic device
- light
- technical box
- speakers + amplifier
- Several LEDs RVB spots
- DMX cables

Scenocosme : Grégory Lasserre & Anaïs met den Ancxt : www.scenocosme.com

The couple artists Gregory Lasserre and Anais met den Ancxt work under the name Scenocosme. They live in the Rhone-Alpes region in France.

Their singular artworks use diverse expressions: interactive installations, visual art, digital art, sound art, collective performances etc.... Scenocosme mix art and digital technology to find substances of dreams, poetry, sensitivity and delicacy. These artists overturn various technologies in order to create contemporary artworks. Their works come from possible hybridizations between the technology and living world (plants, stones, water, wood, humans...) which meeting points incite them to invent sensitive and poetic languages. The most of their interactive artworks feel several various relationships between the body and the environment. They can feel energetic variations of living beings and design interactive stagings in which spectators share extraordinary sensory experiences.

Their artworks are exhibited in numerous museums, contemporary art centres and digital art festivals in the world.

They have exhibited their interactive installation artworks at ZKM Karlsruhe Centre for Art and Media (Germany), at Daejeon Museum of Art (Korea), at Museum Art Gallery of Nova Scotia (Canada), at National Centre for Contemporary Arts (Moscow), at Contemporary Art Museum Raleigh (USA), at Bòlit Centre d'Art Contemporani (Girona) and in many international biennals and festivals : Art Center Nabi / INDAF (Seoul), BIACS3 / Biennial International of Contemporary Art of Seville (Spain), Biennial Experimental (Australia), NAMOC / National Art Museum of China / TransLife / Triennial of Media Art (Beijing), C.O.D.E (Canada), Futuresonic (UK), WRO (Pologne), FAD (Brasil), ISEA / International Symposium on Electronic Art (2009 Belfast, 2011 Istanbul, 2012 Albuquerque, 2013 Sydney), EXIT, VIA, Lille3000, Ososphere, Scopitone, Seconde nature (France)... during important events : World Expo (Shanghai), Nuits Blanches (Toronto, Halifax, Bruxelles, Brighton, Amiens, Segovia, Bucharest), Fête des lumières (Lyon)... and in various art centers : MONA (Australia), MUDAC, Fondation Claude Verdan (Lausanne), Musée lanchelevici (Belgium), Kibla (Slovenia), Banff Centre (Canada), Villa Romana (Firenze), Utsikten Kunstcenter (Norway), Watermans (UK), Centre des arts d'Enghien-les-Bains, Gaîté Lyrique (Paris) etc.
